

YOUNG WOMEN IN EUROPE SHARE THEIR THOUGHTS ON AI AND EDUCATION

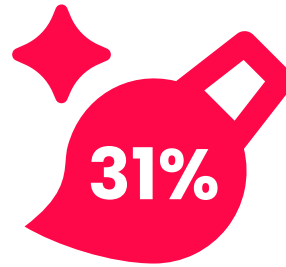

This report brings together insights from focus groups and surveys conducted in six European countries: Lithuania, Cyprus, the Netherlands, Greece, Portugal, and Spain.

● KEY HIGHLIGHTS

Interest in AI Education

of young women said they weren't interested in learning about how AI can be used in education. The rest are curious and eager to explore it further!

Experience with AI Tools

have just started using AI for work or study, 15% said they haven't tried AI tools yet.

Many participants shared stories of facing negative comments when pursuing tech-related fields.

"People often tell me that tech isn't for women. It's hard to stay motivated when you hear that."

● WHAT KEEPS THEM MOTIVATED

Support from peers and learning in groups stood out as key factors:

"Having friends who are also interested in AI makes me feel less alone."

"Group activities help me learn better and feel more confident."

What They Want in AI Education

Young women want learning to be fun and interactive. Gamified experiences, access to mentors, and tools for working together top their wish list.

The Power of AI

A remarkable 60% see AI as a way to boost job opportunities and drive meaningful change, especially in sustainable development.
