Business Research Unit (BRU-IUL)

Activities and Indicators

The Business Research Unit of the Instituto Universitário de Lisboa (ISCTE-IUL), BRU-IUL, is a scientific research entity accredited by the Fundação para a Ciência e a Tecnologia (FCT), a governmental organism. The Unit is oriented to multidisciplinary research within the broad areas of economics and management.

In order to consolidate as a Top level research Unit and to provide ISCTE-IUL with the best business and management education in Portugal, the Unit has progressively altered its structure. Membership rules were tightened, research groups were reorganized and renamed, and their scope of investigation narrowed in line with researchers' interests and the Unit's research vocation.

This report's focus is on the Unit's activity during the years of 2011-2013.

Our main activities during 2011-2013 focused the Unit Governance, human and physical resources investment, establishment of more demanding admission and tenure rules, increase the research outputs, increase the Unit and our research funding with more diverse funding obtained from European union and from private entities to conduct applied research.

A summary of these activities are listed below.

1. Since 2010 the Unit is governed by an Int. Scientific Advisory Board, an Audit Committee, a Scientific Committee, and a Group Coordinators Committee which guarantees the sustained development in the years to come.
2. During 2011-2013 BRU-IUL, with ISCTE-IUL and FCT support, has significantly invested in physical space, network infrastructure and human resources. For example, there was an intake of full-time researchers (8 researchers were hired in Economics, Finance, Management, Human Resources and Marketing; FCT Ciência 5-year recruitment program). Two additional positions are currently open for Marketing and Management. Besides contributing to research quality, these researchers' involvement in the scientific life of the unit is noticeable (e. g. S. D. Russo and E. Gaisteiger organize the BRU Seminar Series). Following International Scientific Advisory Committee's recommendation, an expert in grant application was hired.

3. Several initiatives were targeted at creating a rich and intellectually challenging environment for high-quality research. In 2012, the BRU Research Seminar Series was expanded, continuing the very high quality record of the Director Seminar Series launched in 2011. This initiative, held at least once a month, provides a regular outlet for formal presentation and discussion of recent research by eminent foreign scholars (e.g. Donald Truxillo, Portland State Univ.; Helmut Lütkepohl, DIW Berlin). During 2008-2012, BRU researchers also organized several major scientific events, e.g. EMAC Conference, 2012 Annual Finance Conference (as in 2011) and Future of Banking Regulation (in collaboration with Fulbright).

The launch of BRU Working Paper Series in 2012 was another important landmark rendering the Unit's research publicly accessible at an earlier stage. It is listed in RePEc, on the Unit's website, and involves co-authorship with researchers from other national and international universities.

We collaborated with INDEG in the edition of 3 journals: *Revista Portuguesa e Brasileira de Gestão*, a joint endeavor with the Fundação Getúlio Vargas (Brazil); *Global Economics and Management Review*, which will be published by Elsevier; *Portuguese Journal of Quantitative Methods*. All journals have an international peer-reviewing system.

4. In Sept. 2010 BRU tightened its admission and tenure rules, a clear intention to promote high-quality research. In May 2012, the Unit approved stricter admission and tenure rules for integrated membership. These new rules followed the Unit's resizing efforts that began in 2010. Associate and assistant membership is also possible. Membership of this kind involves the analysis of the CV of proponents on a case-by-case basis.

5. As for the research output (see table; full report in attach), during 2011-2013 the integrated researchers (eligible, FCT terminology) published 378 papers in international peer review journals: 181 articles in ISI indexed journals (examples listed in this report, full list in attach), 83 in Scopus indexed journals and 114 articles in other international peer-reviewed journals. Furthermore, researchers presented 572 papers at international conferences. These are some good examples of our productivity.

6. During this period several scientific projects were approved, developed or concluded.

For instance, in 2012, 36 researchers were involved in 11 FCT projects with grants totaling €530.561,00. In this year, 1 project with total funding of €159.178,00 was completed. Still in 2012, 1 new project was accepted for initiation in 2013 (PTDC/IIM-GES/3933/2012) with a total grant of €40,000.00.

The Unit continues its efforts to attract funding from the E.C. For instance, during 2011-2013, 6 BRU researchers were involved in 2 European projects with grants totaling €709.128,00. 'QUASER' project is an example of E.C. funded projects in which BRU promotes collaboration across research groups and

with a number of int. universities (King's College London (U.K.), University of Stavanger (Norway), Erasmus University (Netherlands), among others). In 2012, 1 new E.C. project (VS/2012/0416) was accepted for initiation in 2013.

The Unit also continues its efforts to attract private funding for applied research. In 2012, 5 researchers were involved in 3 projects with Mutualidade Sta. Maria (€143.100,00) and in 2013 we started the preparation of a project in tourism management – until 15 (previewed €150.000,00).

7. The PhD programmes were restructured into 3 (Economics, Finance, and Management, the latter with 5 specialization tracks), and started to be taught entirely in English in 2012. The rules for Faculty Assessment were introduced. Another significant increase over the previous period was that 18 PhD students received competitive FCT and ISCTE grants and we received several visiting international students.

8. The Unit undertook several outreach activities, such as the development of BRU-IUL website (<http://unide.iscte.pt/>), the publication of books for the general public (e.g. Competitiveness in the real economy, Vinhas da Silva 2012), the participation at or organization of conferences and seminars directed to society (e.g. ISCTE-IUL Tertúlias “A falar é que a gente se entende”, International Conference on Entrepreneurship, Conference on game-based learning) and the participation at media activities. Moreover, several BRU-IUL researchers maintain close contacts with enterprises and industry, undertaking consulting, executive teaching and applied research assignments, which is also fundamental to attracting private funding. Industry contracts were often channelled through IUL-Global (ISCTE-IUL's entity for consultancy).

In summary, all the activities previewed were accomplished and new activities were developed.

The following section summarizes few selected indicators to present a general overview.

The list of **Papers in International Peer Review Journals (2011-2013)** is presented in other annex.
