

# WISE-AI PROJECT: FINAL EVENT AND PROJECT RESULTS

Welcome to the final edition of the WISE-AI project newsletter. Over the past months, we have worked closely with our partners to develop tools, test ideas, and engage young people across Europe. We are excited to share that the project has now reached its final stage.

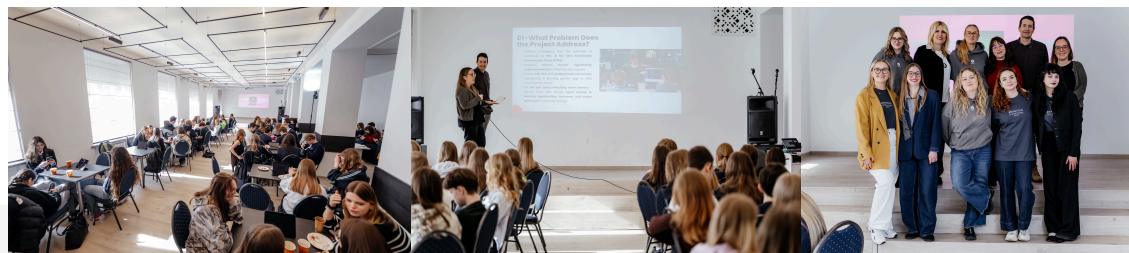

## FINAL EVENT IN VILNIUS

On March 19, the final WISE-AI event was hosted in Vilnius by AY Institute, bringing together students, educators, and international partners.

During the event, participants had the opportunity to:

- Explore the basics of artificial intelligence
- Engage in interactive activities and discussions
- Hear insights from our guest speaker Kateryna Piddubna from Women Go Tech
- Connect with partners from across Europe

The event created a space for learning, exchange, and inspiration, highlighting the importance of inclusive participation in the AI field.

## WISE-AI KNOWLEDGE PORTAL – NOW AVAILABLE

One of the key results of the project is the WISE-AI Knowledge Portal, which is now live and accessible online.

The portal offers:

- Introductory learning materials on artificial intelligence
- Practical tools and resources
- Accessible content designed especially for young learners

It is designed as an open learning environment for anyone interested in exploring AI and developing digital skills.

## MINECRAFT EDUCATIONAL GAME – LEARNING THROUGH PLAY

We are also proud to present the WISE-AI Minecraft Educational Game, now available on our website.

The game provides an interactive way to:

- Learn AI concepts in a simple and engaging format
- Explore real-world applications of technology
- Understand the connection between AI and the Sustainable Development Goals

[Access the Game](#)

This approach combines education and creativity, encouraging participants to learn by doing.

## PROJECT IMPACT

Throughout the project, we have focused on empowering young people, especially girls and young women, to feel more confident in exploring artificial intelligence and technology.

By combining research, education, and interactive tools, WISE-AI has contributed to:

- Increasing awareness of AI opportunities
- Supporting digital and entrepreneurial skills
- Promoting more inclusive participation in the technology sector

## LOOKING AHEAD

Although the project has reached its official end, the results will continue to be available and used.

We encourage you to explore the platform, try the game, and share these tools with others.

Thank you for being part of the WISE-AI journey.
