New Visiting PhD Student at BRU-IUL

Jesús Sanchez Gomez is a new visiting researcher at BRU-IUL.

Jesús will stay at BRU-IUL from 30/06/2015 to 03/09/2015.

Jesús Sánchez is a PhD candidate at the Human Resources Psychology Doctoral program from the University of Valencia. Currently Jesús is a junior researcher at IDOCAL (Institute of research on Psychology of Human Resources, Organizational Development and Quality of Work Life), collaborating with the research group on teamwork, focused on the area of technology-mediated work groups. During his stay at ISCTE-IUL he will study the topic of emergent leadership in virtual communities.

To get in contact with Jesús, use his email: jesus.sanchez-gomez@uv.es

We welcome Jesús, and wish him a successful and productive stay at BRU!

New Visiting Researcher at BRU-IUL

Sevgi Eda Tuzcu is a new visiting researcher at BRU-IUL.

Sevgi will stay at BRU-IUL from 31/07/2015 to 30/10/2015.

Sevgi holds a PhD degree from Middle East Technical University (2015) , entitled “ A New Look at Mutual Fund Tournament Hypothesis Using Spatial Modeling”. Her research interests are investment, behavioral finance and spatial econometrics. Now she had the opportunity to work with Professor António Freitas Miguel and deepen her studies at the Business Research Unit (BRU-IUL).

To get in contact with Sevgi, please find her at office D518 or use her email: stuzcu@politics.ankara.edu.tr

We welcome Sevgi, and wish her a successful and productive stay at BRU!

Congratulations for the BRU-IUL results at the FCT call for projects

We would like to congratulate BRU-IUL researchers for the overall success on the last FCT call for projects in all scientific domains. With our 7 funded projects, out of 23 applications, we had a success rate of 30%, far better than the 13% national success rate. With this result, BRU-IUL researchers will have €362.836 available for research. Of the winning projects, 4 (out of 14) have BRU-IUL as the Principal Research Unit and 3 (out of 9) as a Participating Organization.

This is a major achievement, in particular if we consider the uncertainty caused by the lack of unit core funding as a result of an exasperating FCT unit evaluation process, initiated two years ago and still not concluded. These results demonstrate vitality in the research conducted by BRU-IUL researchers, and clearly indicate that we should keep investing on producing excellent quality research projects and submitting them to competitive calls!

- The winning projects were:**
- Principal Contractor- ISCTE-IUL:
- PTDC/MHC-PSO/1044/2014 –Team cognition, adaptation and multiteam systems in dynamic environments - Ana Passos
 - PTDC/IIM-ECO/3097/2014 – New inference Methods for time series data based on resampling schemes in economics and finance –Paulo Parente
 - PTDC/IMM-FIN/7188/2014 – Managerial pay in banks and the financial crisis- Mohamed Azzim
 - PTDC/IIM-FIN/1500/2014 – Mutual fund management, national culture and markets integration- António Freitas Miguel
- Principal Contractor- other institution:**
- PTDC/MAT-ANA/1275/2014- Global properties of solutions of the Einstein equations –João Costa
 - PTDC/IIM-GES/2686/2014- Dissemination of the information of financial institutions in times of crisis – Helena Isidro
 - PTDC/IIM-GES/3501/2014- The emergence and consequences of collective psychological ownership in teams- Ana Passos
